

# Energy & Desal

*Learn how the City of Santa Cruz and Soquel Creek Water District are evaluating energy requirements and ways to reduce the carbon footprint for the proposed desalination project.*

## **Community Meeting:**

### ***Seawater Desalination – Energy Use & Climate Impacts***

- A sustainable water supply is critical for our community and recent updated supply and demand projections illustrate a supplemental supply is still vitally needed.
- Both agencies are committed to thoroughly studying all potential environmental impacts of the proposed project.
- Along those lines, reducing energy and greenhouse gases (GHGs) related to desalination are important.
- Come and learn about scwd<sup>2</sup>'s process to meet regulatory and community goals for energy efficiency and GHG reduction.
- Question and Answer Session
- Speakers: Heidi Luckenbach, *scwd<sup>2</sup> Desalination Program Coordinator*  
Susie O'Hara, *Assistant Engineer, City of Santa Cruz*  
Todd Reynolds, *Senior Engineer, Kennedy/Jenks Consultants*  
James Barsimantov, *Technical Working Group Member and Principal of Ecoshift Consulting*

**Thursday, December 8, 2011**

**6:00–8:00 pm**

**Live Oak School, 1916 Capitola Rd., Santa Cruz**

*For more info: [www.scwd2desal.org](http://www.scwd2desal.org)*

**Sponsored by the City of Santa Cruz & Soquel Creek Water District**

*The fifth in a series of **scwd<sup>2</sup>** community informational meetings.*
